MESSAGE FROM SPRING SINGAPORE

Singapore's vibrant accounting sector plays a critical role in its economic development and underpins its reputation as a leading financial and business centre in Asia. With the increasing business demand fuelled by overseas expansion of enterprises into fast-growing markets in Asia, there is immense growth potential for this sector.

In recent years, demand for emerging advisory areas such as risk management, business valuation and international taxation has been rising. It is therefore important that our accounting firms build up these capabilities in order to deliver comprehensive, high-quality service to their clients. I am heartened by the Institute of Singapore Chartered Accountants' (ISCA) efforts to help their members stay competitive by partnering SPRING Singapore in various initiatives. This directory is one of the ways ISCA helps to increase the profile and capabilities of public accounting firms and their service offerings.

As the enterprise development agency, SPRING Singapore works with partners like ISCA to foster capability development both at the industry and enterprise levels, to enhance productivity, encourage innovation and to enable sustainable growth. In line with the Committee to Develop the Accountancy Sector (CDAS)'s vision for 2020, SPRING continues to support ISCA to deepen Singapore's expertise in higher value-added accountancy and advisory services, so as to anchor the country as the leading global accountancy hub for the Asia-Pacific.
